1.0 Engagement

1.1 Student Engagement

UFV/SUS Leadership Conference (Winter Semester-First week of February)

As a huge advocate for student engagement, I have a passion for leadership programming. Not only will we be able to put UFV on the map, but teach students some valuable transferable skills.

UPDATE (JULY 2017): ON HOLD, the organization is currently pursuing other avenues, plan to start this in October.

1.2 Additional Communication Methods

President's Quarters (Open Door Policy – May to Apr)

The President's office hours will reflect student's needs. It has been discussed that students would like to be more aware with what is happening with SUS. Always on campus and available for one-on-one meetings with students.

UPDATE (JULY 2017): IN PROGRESS have had 100+ students in for some good organizational conversation.

Videos introducing students to areas of the SUS (one per service – developed throughout term)

I will be creating videos to introduce UFV students to the following services:

- FixIT
- SUS Health and Dental plan
- SUS UPass
- UFV Campus Connector
- SUS Health Centre
- SUS Food Bank
- SUS G.E.C.
- SUS Pride Center

The purpose of creating these videos is to provide general information about these services and to answer any frequently asked questions. Once completed, these videos will be posted on the SUS website and social media.

UPDATE (JULY 2017): IN PROGRESS was an idea, I plan to finish from last year. As we add services, and hire a new team, this will be a highlight project. Will be on going for the term as things change.

Develop integrated newsletter messaging with emails (September)

Many new students remain unaware of the Student Union Society until several semesters in to their undergraduate experience at UFV. As it benefits our members, I plan to create a bi-weekly news letters so students are aware with SUS indicatives. With the help of UFV, we will gain access to direct lines of communication, through emails.

UPDATE (AUGUST 2017): COMPLETED working with OReg, to gain access and newsletter software to implement for the new semester. Also following policy to prevent anti-spam tactics.

2.0 Operations

2.1 SUS Clubs and Associations Office

After Board approval of space allocation, I will be helping the VPi to develop the SUS C&A space in partnership with UFV student membership throughout my term. An open process will be outlined and implemented to guide the development of this space and its services.

UPDATE (AUGUST 2017): COMPLETED a space swap with the current SUS lounge/SUS C&A room passed board. Additional funding will be supported by UFV, for furniture and student staff. On wait for some discussion on needs in space from VPi/C&A, then a swap will occur prior to the new semester.

2.2 SUS Pride Centre

After Board approval of space allocation, I will be helping to develop the SUS Pride Centre in partnership with UFV student membership throughout my term. An open process will be outlined and implemented to guide the development of this space and its services.

UPDATE (July 2017): IN PROGRESS An open working group has helped complete the discussion service/space development. Once a personal has been hired, Phase 2 of the project will continue. Room arrangement, active/passive programming will commence.

2.3 SUS Gender Equality Centre

After board approval of space allocation, I will be helping to develop the SUS Gender Equality Centre in partnership with UFV student membership throughout my term. An open process will be outlined and implemented to guide the development of this space and its services.

UPDATE (July 2017): IN PROGRESS An open working group has helped complete the discussion service/space development. Once a personal has been hired, Phase 2 of the project will continue. Room arrangement, active/passive programming will commence.

2.4 UFV/SUS Collegium

I will be focusing on creating a safer and more engaging space with UFV. A movement to create a collegium "Cascade Collegium," is in the works with UFV.

UPDATE (SEPTEMBER 2017): COMPLETED a space swap with the current SUS lounge/SUS C&A room passed board. Additional funding will be supported by UFV, for furniture and student staff. On wait for some student discussion on needs in space, then a swap will occur prior to the new semester.

3.0 Representation

3.1 Exam Study Space

As per the SUS Strategic plan for 2016-2017, the recommended theme for assessment is student health and well-being. UFV has released a Strategic Enrollment Management plan that highlights a commitment to health and wellness; a Health and Wellness fee was recently implemented to support such efforts.

SUS will also be highlighting the importance of health and wellness in the lives of students. I will be developing a Health and Wellness Fair around exam period. Additional Study Space and longer hours will be available to students during this time. More details will be presented to the Board of Directors as they develop.

UPDATE (DECEMBER 2017): COMPLETED I plan to take action to increase and dedicate big space for students to study longer. Also more space for group work, will be working with SUS Facilities to make the Hall more available for student usage. Also see if we can extend Fair Ground Operations during these crucial periods, to cater to student needs.

4.0 Support

4.1 UFV/SUS Chilliwack Recreation

After board approval from the previous team, I have been in meetings and help finding numbers and facts as to why a UFV/SUS Recreation is important. The process, is in motion and should be finished for September. The wait on space improvements from UFV is the final phase.

UPDATE (AUGUST 2017): COMPLETED I met with UFV Recreation, and the process for change is in motion. Just a little wait on the space, and the GYM should be up and running. This sets us up for discussions about the Abbotsford Campus Recreation usage for the future.

5.0 Other

5.1 UFV Sexual Violence Prevention Training

I will be assisting in the start-up of the Sexualized Violence Prevention (SVP) Training with UFV. This came from Sukhi's push with UFV to create a Sexualized Violence Policy.

UPDATE (JULY 2017): IN PROGRESS we have reviewed the training program with UFV. After a discussion, they will be moving forward to hire and train students to present this program.
