

**SUS President  
Final Monthly  
Report**

April 2021

**PREPARED BY:**

Jessica L. Levesque, B.B.A

# AGM

UFVSUS recently hosted their Annual General Meeting. In order to increase student engagement and turnout, the Executive team made the decision to shorten the meeting substantially to only cover essential items in addition to securing a brand new Lenovo ThinkPad E-15 laptop.

We were unable to meet quorum on the first attempt which pushed back the date by one week. In the second session, we were able to meet quorum and passed all matters put forward to students. During the AGM, we drew the prizes live from the list of attendees and were able to notify the winners in real-time.

Going forward, it is my recommendation that UFVSUS continue to host shorter AGMs in addition to increasing the marketing efforts to increase student engagement.

# TRANSITION

Previously, SUS did not have a formalized transition process or standardized documents. Over the past several months, I have been in the process of researching the key components of a transition plan/document and have been bringing in the components that align best with our organization.

The transition docs were completed recently and include:

- About SUS
- Values
- Stream
- Organizational structure
- Departments
- UFV Who's Who
- Advocacy Groups
- Knowledge Transfers

This is a working document that is to be updated each year as the roles shift and the overall priorities change within the society.

# CASA EDI

CASA recently hosted an EDI conference that spanned over 2 days. The sessions included the

- National Education Association of Disabled Students (NEADS) report
- Moving forward with the National Indigenous Advisory Council
- Best Practices for EDI on your campus
- CSV conversations
- Decompression time
- Inclusive advocacy, the role of student leaders in promoting EDI within Husoni Ramond

# STUDENT ADVOC

As we wrap up our term, I have had a focus on the concerns that students have brought forward. I will be meeting with Dr. James Mandigo on the final day of my term and will be providing a wrap report of the main concerns in addition to any outliers that came along. In addition, we will be covering how this can be handled in the future as having the UFVSUS President single-handedly manage all the issues is not maintainable.

# WEEK OFF

So..... I was out of commission for one week straight after a BMX jump gone wrong. During this time, the rest of the team did an incredible job of supporting me during my absence!

*...and with that,*

PRESIDENT  
LEVESQUE,  
OUT!
