

I am Mehmet Ercan. I am a fourth year Bachelor of Integrated Studies student at UFV. I have been a student at UFV since 2018. My passion for student representative title is to be a voice of the students with my five years of experience in this school plus being an active and engaged student in campus in multiple ways. My motivation to apply this position is to help building a better student life in campus and to find solutions for students' problems. My main goal is to unleash my potential and to experience governmental structure in a Canadian school with an international approach.

As I stated above I have been a very active student over the past years. I am volunteering as a radio show host at CIVL, I volunteered to organize basketball intramural league last year and I am a basketball referee this year for UFV REC, I am a Community Assistant(CA) in Lalem te Baker, I was one of the qualified student for Town and Gown 2022, I volunteered in important events in UFV such as Open House 2022 and Convocation 2023. All those experiences helped to communicate with incredible amount of students. I listened to many students about their life experiences and struggles. I have been trying my best to support students in any way. There have been times that my support was not enough. I learned the sources that are around us and if I am not qualified for some certain issues I always direct students to the sources they need. I have gained so many skills and experiences since I have been a student. With those skills and experiences I am very confident that I will bring a very unique way to support students.

I am very motivated and goal orientated individual for this position. I am very confident about myself and the teachings that UFV has provided to me. Now, it is my time to apply this knowledge in this governmental position and give students the best help we can give.
