

UFV Faculty of Health Sciences Representative Statement

Hello everyone! My name is Ravneet Sohal and I am currently a second year student in the Bachelor of Kinesiology program, specializing in the Exercise Science stream. I am passionate about bringing forward the perspectives and voices of all members in the Health Sciences faculty. I am determined to work hard with complete honesty and in good faith to help make decisions that are in the best interests of everyone. I will ensure that the organization's interests are given utmost priority and that the organization has all the resources it requires. The teamwork and leadership skills I have acquired from previous volunteering experiences, including many mentoring programs and non profit organizations, will help me fulfil this responsibility effectively. As a faculty representative, I understand the importance of being aware of current issues and accomplishments within our faculty and I am determined to bring those to the Board's attention when required.
