

Hello, I'm Tanvi Malik. I'm a second year Bachelor's in Computer Information Systems student at UFV, and I'm eager to represent you as a student representative. I've actively engaged on campus, participating in various events and volunteering opportunities, where I've learned to connect with people and create welcoming spaces. I began my volunteering journey as a CLIMB guide on campus and later was promoted to one of four CLIMB leads with the UFV International Department. Alongside these experiences, I've also served as an Orientation Ambassador. As I organize events and set up info tables on campus, I've gotten to hear and understand the stories of many UFV students. Engaging in these activities helps me connect with my peers and inspires me to represent our community effectively.

Currently, I hold the position of Accessibility Outreach Assistant, actively working to promote accessibility and inclusivity on campus. Additionally, I serve as one of the six students on the UFV Accessibility Committee, advocating for policies prioritizing accessibility. I'm also a part of the UFV Body Positivity Club, serving as Treasurer to promote a positive body image on our campus. I aspire to be a board member at SUS because I believe diverse voices are crucial for meeting everyone's needs, and I am committed to making our campus more accessible for everyone. I am aware of the issues students are facing and the changes they would like to bring forth. I appreciate the complexity and importance of making decisions that impact a large number of students. I want to help and be a provincial board member to make sure UFV students' opinions are considered in provincial decisions.
